ADVANCED TRAINING. EXCEPTIONAL RESULTS.
Night Flight Concepts Night Vision Goggle (NVG) aircrew training programs provide real-world, state-of-the-art academic curriculum, hi-fidelity simulation and mission-oriented training to increase safety, situational awareness and operational capabilities at night.

MARKET NEED
Organizations face a variety of challenges in training and maintaining competence in night vision operations. Challenges, such as demanding operational tempos, fiscal restraints, limited access to equipment, training and operational support and experience. These factors greatly reduce the viability of traditional training methods.

TRAINING OVERVIEW
Designed to merge cutting-edge technologies with exceptional industry experience, Night Flight Concepts offers innovative training programs that provide up-to-date, relevant, comprehensive information on the latest NVG technology. As the premier provider of innovative and comprehensive NVG solutions, Night Fight Concepts consistently introduces value-added programs to support the advancement of the NVG industry worldwide.

No other NVG training provider boasts a more robust, regulatory compliant curriculum. The company’s training programs developed by seasoned NVG operators deliver value to the customer by using a blended solution. Training leverages advanced technologies and training methods to maximize learning effectiveness, including computer-based training, virtual terrain boards, and proven, reliable training techniques. Night Flight Concepts embraces continuous improvement by reviewing and improving upon curriculum to meet the ebb and flow of information related to NVGs and optimal training instructional design methodologies to optimize the learning experience.

TRAINING HIGHLIGHTS
The Night Flight Concepts “Safety in Training” philosophy is not limited to our internal training programs. The NVG train-the-trainer program provided by NFC to our customers is comprehensive, intense, and challenging, even to the most seasoned instructor pilot. With a focus on instructional fundamentals, this program highlights technology, methods, techniques, and best-practices. In addition, instructional intervention techniques are built upon, resulting in a competent NVG instructor.

Night Flight Concepts challenges the most competent NVG pilot by combining the NVG training program with aircraft-specific maneuvers. NVG courses highlight autorotations, hydraulic and tail-rotor malfunctions, as well as FADEC or other engine control malfunctions while using NVGs. All of Night Flight Concepts NVG training programs are available in both single and twin engine aircraft.

The company has distinguished itself as the only NVG training provider with multiple training locations in both the US and Canada. NFC has selected well-established training facilities to provide our customers with standardized curriculum and instructional techniques in varying flight environments. Working directly and through strategic alignments, Night Flight Concepts provides NVG training throughout the world.
