

NVIS Cockpit Inspection Scope

NVG-104

Night Vision

Product Outline

The NVG-104 Inspection Scope is designed to allow the user to inspect an instrument or an entire cockpit. The following is a list of scenarios for which the NVG-104 is ideal.

- Preflight inspection
- Recurring inspections
- New equipment installed into the cockpit
- Cockpit instrumentation has been removed from the aircraft for any reason
- Equipment may have been damaged and/or repaired
- Local protocol for aircraft inspection

The NVG-104 has a precisely tuned and calibrated filter that only allows the user to view energy that would decrease night vision goggle acuity. The inspection scope is an easy to use, cost effective way to inspect a crewstation to ensure flight safety.

Product Features

- Rugged Design
- Single Battery Use
- One Year Warranty
- Minature Size
- Light Weight
- Meets Standard Mil-Spec Requirements

Example of what you will see through NVG-104 Inspection Scope in a non compatible cockpit.
