making vision happen

## **STRATEGIC BUSINESS ALLIANCE**

**GLADSTONE AEROSPACE ANNOUNCES THE ESTABLISHMENT OF A STRATEGIC BUSINESS ALLIANCE WITH NIGHT FLIGHT CONCEPTS**, a company based in Florida, USA. Night Flight Concepts (NFC) was formed in 2006 by experienced U.S. Army aviators, maintenance technicians, and safety officers. NFC meets the challenging need and continuing growth of night vision goggle (NVG) operations within the United States and abroad, particularly for law enforcement agencies, air medical/rescue services, military organizations, and government task force agencies; our "First Responders."

The purpose of the Alliance is to establish a framework for cooperation between NFC and GAC and to leverage each Party's respective know-how, experience and resources for each other's mutual benefit. "Given the respective experience and capability of each organization, this agreement makes good business sense", says Keith Gladstone, President Gladstone Aerospace. GAC has extensive contacts and experience in the Canadian Aerospace, Defence and Security (ADS) market. By working closely with GAC on joint programs, specifically in the area of Night Vision training and maintenance support, NFC hopes to gain greater access to the Canadian ADS market.

For GAC, the reverse is also true for the ADS market in the United States. NFC fully understands the nuances and needs of that market and can help GAC establish a market presence there. While North America is the initial focus market, the intent is for the two companies to collaborate in international markets as well.

Working with NFC, GAC hopes to offer Canadian customers increased access to the high standard of service in night vision training, night vision modifications and night vision maintenance that NFC's current customers currently enjoy. "The alliance will significantly improve access to markets for both companies and hopefully enable us to increase our business", stated Adam Aldous.

## **GLADSTONE AEROSPACE**

GLADSTONE AEROSPACE provides a full range of aerospace consulting services including business development, integrated training solutions, human factors engineering, and flight test and evaluation program support.

## **NIGHT FLIGHT CONCEPTS**

Night Flight Concepts provides customers with night vision training, night vision equipment, night vision maintenance services, and night vision consultation.
